Important Information

Copyright

All the music score we made is based on the sheet music which have already been in the public domain (No matter date or country). There are some music composed after 1923 also in the public domain, we guarantee all the sheet music from us are based on public domain.

We also arrange works that are protected by copyright law after obtaining licenses. Here is a gentle reminder - We treat copyright very seriously.

If there is anything concern please do not hesitate to contact us.

How we make the sheet music

1. Search as much as possible for various versions of the sheet music that enters the public domain. We will consider that the time of copyright invalidation is different in each country;

2. Compare the sheet music from step 1;

3. Select one of the versions to re-edit (most of the time), or make a new version with reference to the base version, or adapt it according to the selected version;

4. Proofread by the different staff members at least 3 times;

5. For some sheet music, we may export an audio, which is only used for reference, and can not be compared with professional performances and singing.

MORE SHEET MUSIC

MORE SHEET MUSIC is a professional team of music writers, adapters and editors, from 2016. Except for a small part of music creation work, most of our work is to adapt and re-edit music that has entered the public domain. We believe that by comparing versions, re-editing and adaptation, clearer versions, more versions and formats can be produced, which is needed in the era of internet, big data and artificial intelligence. It will contribute to the spread and use of music and make people love music and life more.
